

Instructions on how to download TomTom Itineraries

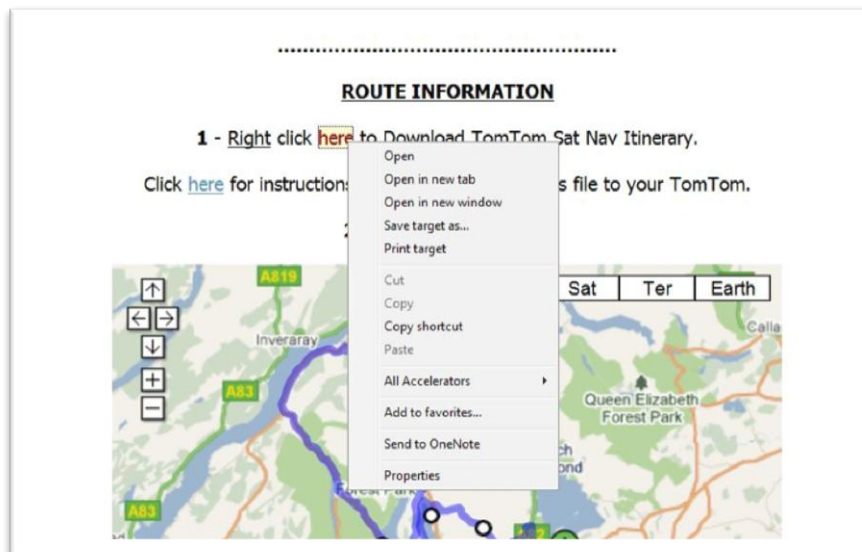

Note: Microsoft Windows 7 and Internet Explorer 9 were used to compile these instructions. Different operating systems and browsers may not perform in the same way.

COMPUTER INSTRUCTIONS

1. Connect your TomTom to your computer with a USB cable.
2. Switch on your TomTom device.
3. If “TomTom Home” starts, this can be closed as it is not required.
4. Use “**Windows Explorer**” to identify the drive letter being used by your computer.

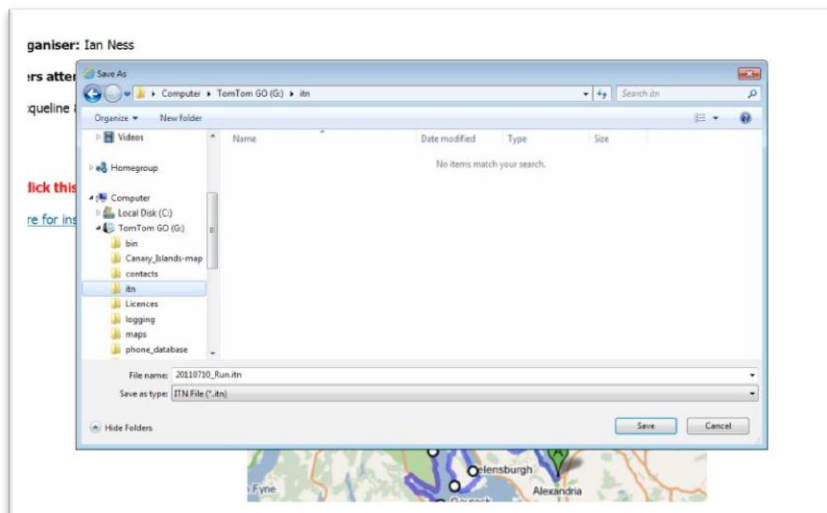

5. The above image shows that my computer has my TomTom attached to drive (G), yours may be different. It also shows the “itn” folder that all TomTom itineraries should be saved to.
6. Open the required website event page containing the download link you wish to download.
7. Right click on the “TomTom Itinerary” hyperlink

8. From the menu that appears select “**Save target as**” (or “Save as”)

Instructions on how to download TomTom Itineraries

9. When the “**Save As**” box appears click on your TomTom drive letter. (in this case it’s G)
10. Expand the TomTom drive and select the “**itn**” folder.
11. The “**File name**” should read something like “**20110710_Run.itn**”
12. The “**Save as type**” should read “**ITN File (*.itn)**”
13. Now click the “**Save**” button and the itinerary will be saved to your TomTom.
14. When safe to do so, disconnect your TomTom from your computer.
